Submission Index

Hotel booking cancellation on Android (Voya), built on Agoda's Demand API

PM101 Mid-Course, Masters' Union · October 2026

Team: Om Umrania, Param Parekh, Shabareesh Parlakota, Arushi Gupta, Manya Mahajan

What is in this folder

01 Presentation deck	The full submission: cover, scope and assumptions, information architecture, logic and information flow, 16 wireframes (A to P) each with Design, Developer and Business notes, an API-to-screen map, and the product note. 13 pages (11 core plus a 2-page note).
02 Product note	The product note as a standalone 1 to 2 page vertical document.
03 Diagrams	The information-architecture tree and the four-lane logic and information flow (swimlane), as images. Both also appear in the deck.
04 Wireframes	The 16 Android screens A to P as individual images. The Design, Developer and Business notes for each screen are in the presentation deck.

How the assignment is covered

Up to 11+2 slides/pages	01 Presentation deck, 13 pages
Workflow/flowchart: information architecture and flow of logic plus information	Deck pages 3 and 4; also 03 Diagrams
Each wireframe with Design (UI/UX), Developer (API) and Business notes	Deck pages 5 to 10; screens in 04 Wireframes
Product note on the overall flow, 1 to 2 pages	02 Product note; also deck pages 12 and 13
Assumptions clearly stated	Deck page 2 and throughout, tagged [D] [A] [V]

Evidence tags used throughout: **D** documented by Agoda on the page cited, **A** a Voya assumption or design decision, **V** unclear or undocumented, to validate with Agoda. All hotels, prices, dates and IDs are simulated test data.
